

Are you getting wary of the constant disruptive market environment? Are your resources able to navigate an increasing complex IT environment to grasp the opportunities it presents? Or is your business burdened with the pressure of integrating capital intensive technology into its framework, which doesn't deliver the business outcomes you're looking for?

Today's enterprise IT applications require agility, automation, and integrated toolsets to provide an enhanced **OPERATE** experience to match rapidly growing business demands.

Typical challenges faced by organisations today.

Lack of harmonisation between business needs and technology adoption

Reluctance to keep pace with evolving technology trends due to lack of exposure

Inability to choose precise tooling combinations

High capex to implement and maintain assorted toolsets

Lack of operational transparency on application maintenance services (Operate) with low predictability for features / enhancements

Our first-in-class approach

If you can relate to any of these experiences, **OperateSync™** is the solution for you. It adheres to new age digitisation concepts, which trigger technology as a layer, to augment Enterprise IT Application Management Services for clients.

OperateSync™ is a framework that is designed with advanced service engineering concepts, which use cohesive toolsets for ITSM, release planning, DevOps, CI/CD/CT/ and CM.

The framework is equipped with pre-configured rulesets, scripts, dashboards and enables a differentiated delivery methodology.

Enhanced with a technology agnostic service and estimation catalogue, the framework extends T-shirt based commercialisation models to address evolving customer requirements.

Client Speaks

Implementing OperateSync™ helped us drive automation for our change and release management processes thereby ensuring that our new features are rolled out for business use at a faster pace than ever before.

CIO - Large smart city development program

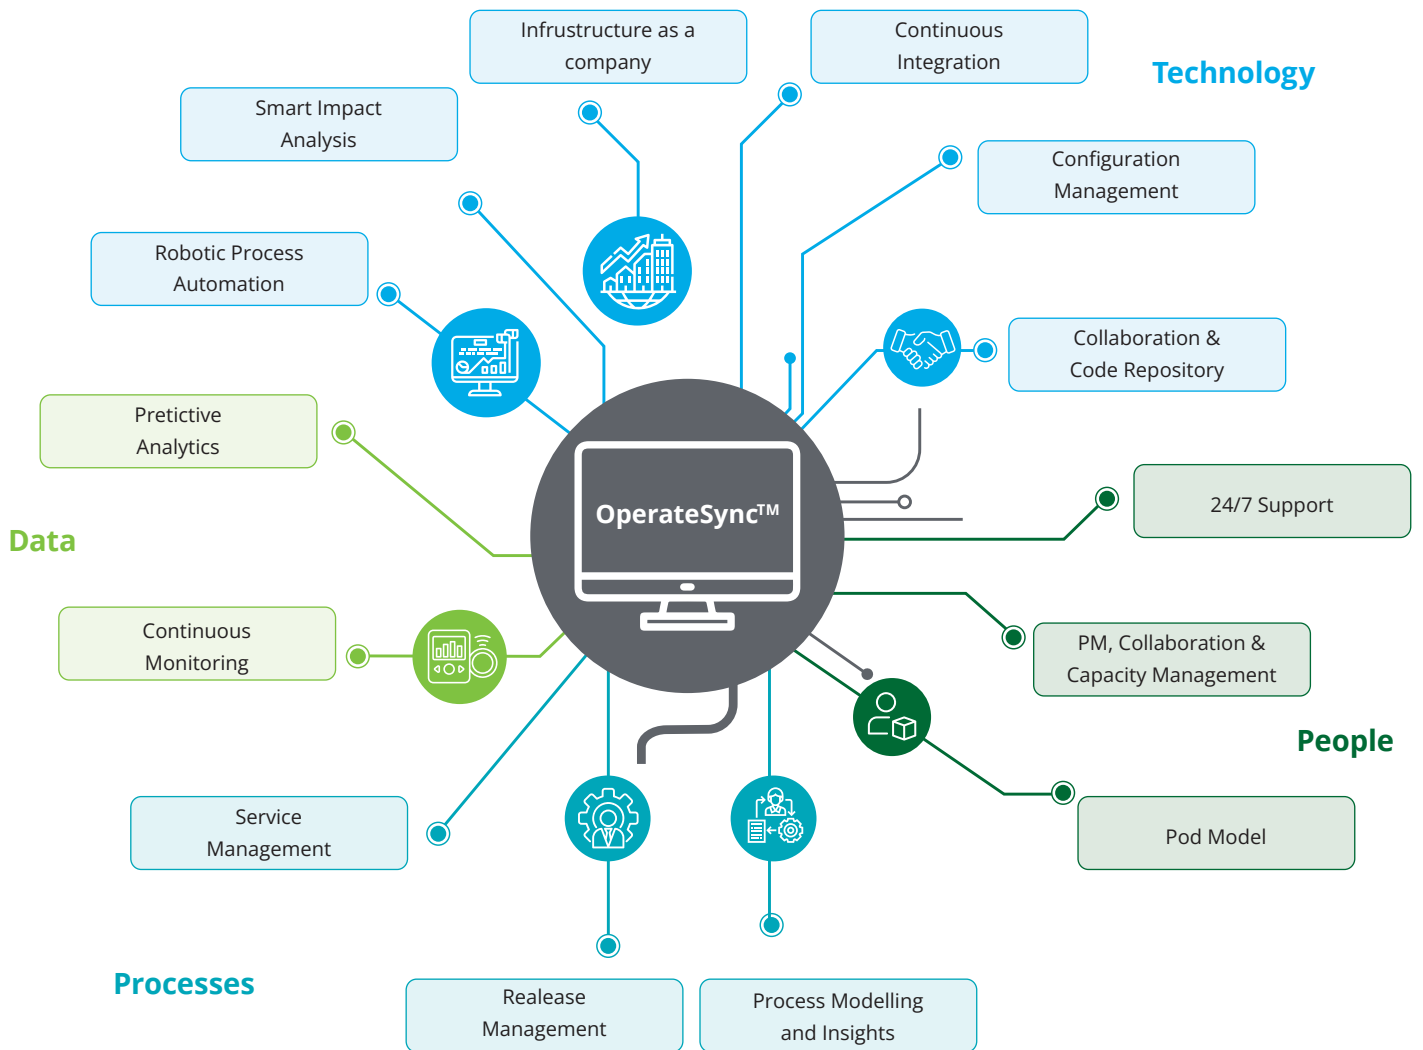

The amount of time being spent in estimating a change request and the associated pricing was a major deterrent in addressing our business requirements. OperateSync™ helped with upfront budgetary controls and a reliable price discovery mechanism which provided enhanced transparency. Today, we are able to estimate quickly and address the requirements 25% faster.

CTO - India's largest seasoning & flavour solution provider.

The support team used to be indulged in updating information in multiple tools being used for service delivery. With OperateSync's integrated toolsets feature, their productivity has improved more than 20%.

Service Delivery Manager - A large Operate engagement with Indian Pharmaceutical major.

Key features and benefits

Upfront budgetary controls

Reliable price discovery

Greater product resiliency

Enhanced end-user experience

Seamless integration across toolsets

Improved transparency for change requests

Creates stable operating environments

High predictability for release cadence
